To whom it may concern:

I am writing this as a letter of recommendation for Environmental Resource Technologies, LLC (ERT) a Division of REGION 8 Enviro, LLC. We have been working with ERT for more than a year at the point and look forward to the upcoming years. This is a company that I very much enjoy having as a contractor. We have had to change our process for disposing of used lamps several times and each time ERT has helped us and insured that the change went as smooth as possible. Initially, they modified their pricing quotes to accommodate our process and prepared an excellent proposal which helped me get the paperwork done on the Universities end. Each time I have a chance to visit their offices in Wheat Ridge I am met by some of the most courteous and friendly people I hope work with. I was also pleasantly surprised to find that they provided packing materials at no extra cost including drums, and this was a radical change from previous contractors. They are also professional and answered all questions that were raised during our on-site inspection. Mike, Michelle, Karl, and Gerry have shown a great willingness to work with us even during some difficulties that arise from helping a compartmentalized entity like a University. I am glad to recommend ERT as a company and commend them on their professional and friendly staff.

Sincerely,

Matthew Hendrickson
